EDUCATION

The University of Hong Kong

Hong Kong SAR

Bachelor of Arts -- Translation | Information Systems and Analytics

Sep 2023 – June 2027 (Expected)

- **Relevant Coursework:** Business Analytics, Information Systems Analysis & Design, Information Systems Management, Statistical Analysis, English – Chinese Written Translation and Interpretation

INTERNSHIP EXPERIENCE

Hutchison Port Holdings Limited

Hong Kong SAR

Product Development & Implementation Intern (IT Dept.)

Jun 2025 – Aug 2025

- **Product Iteration & Business Logic:** Participated in Sprint 91-93 system iterations; gained deep proficiency in core port information systems (nGen, OMS) and the end-to-end operational workflow from vessel creation to load/discharge flows
- **Process Automation:** Utilized Verification Tool to write API requests and designed yard block workflows to enable automated updates for yard planning simulations
- **Visualization & Collaboration:** Leveraged Draw.io to map "Gate Grounding" workflows, facilitating cross-functional alignment by visualizing complex operational details

Shanghai Anyun Rentong Technology Co., Ltd.

Shanghai

Project Manager Assistant Intern

Dec 2024 – Jan 2025

- **Requirements Analysis & Modeling:** Contributed to the "Meibei Terminal Intelligent Security System"; conducted system-level design (use case, class, and sequence diagrams) using UML via Draw.io
- **UX Optimization & Project Management:** Proposed personalized UX improvements and utilized Excel Gantt charts to monitor project milestones, ensuring on-time delivery of initial phases

PROJECT EXPERIENCE

AIGC Visualization Project: Environmental Monitoring

Dec 2025

- **AIGC Prompt Engineering:** Executed a visual creative task themed "Environmental Monitoring and Sustainability" using the Gemini-2.5-flash-image model
- **Iterative Design:** Independently conducted three rounds of prompt engineering—transitioning from basic themes to complex interactive interfaces and sensor logic—producing the high-logic "ECO-DATA GRID" visual solution by streamlining instructions

NYC Traffic Safety Big Data Analysis ([Video Link](#))

Nov 2025 – Dec 2025

- **Spatial Modeling:** Conducted geospatial modeling of 2M+ NYC traffic accident records using Kepler.gl; identified high-risk intersections and temporal patterns (e.g., "Friday evening rush hour") via 3D cluster analysis
- **Data Visualization:** Utilized Tableau to quantify the correlation between driving behavior and injury severity, identifying an 84.2% injury rate for motorcycles and unique weekday patterns for heavy trucks
- **Data Storytelling:** Utilized PR and CapCut to transform Tableau and Kepler.gl visualizations into a 5-mins video with business narrative logic
- **Strategic Output:** Proposed 4 data-driven improvements (including "Flexible Commuting Systems") based on analytical insights

Airfare Prediction Model Analysis

Sept 2025 – Dec 2025

- **Algorithm Selection:** Performed feature engineering on large-scale travel data using R; compared Linear Regression, Logistic Regression, and CART Decision Trees
- **Model Optimization:** Validated that the pruned CART model performed best, doubling explanatory power and reducing absolute error by over 25%
- **Driver Analysis:** Quantified the impact of airlines, cabin classes, and routes on pricing to identify key valuation drivers

SKILLS & CERTIFICATIONS

- **Languages:** Mandarin (Native), English (Advanced. IELTS 7.0), Cantonese (Elementary)
- **Data Analysis & Visualization:** Power BI, Tableau, R, Excel, Kepler.gl
- **Design & Video Tools:** Draw.io, Figma, Marvel App, Smart Draw, Canva, UML Modeling, Premiere Pro, CapCut
- **Certifications:** Microsoft Office Specialist (Expert)
